STEP INTO WOLKY'S WORLD!

Put on a pair of Wolkys and you'll notice right away: **feet love our shoes**. Comfort is what we're all about. That's why all our shoes for this autumn feature anatomically shaped footbeds and are meticulously designed to produce a perfect fit. We also pride ourselves on our passion for styling and colour, carefully selected materials and elegant finish. Almost all our models are available in a choice of colours and in sizes 3 to 10 (36 to 43) – and sometimes even up to 11 (44)! Towards the end of the brochure you'll find our specials: vegan, extra-wide and water-resistant shoes, shoes for bunions and diabetics and waterproof hiking boots.

START

This lace-up boot really is made for walking – slip into a pair and you'll feel it straight away. The seamless vamp not only makes the boot look super hip, but it also eliminates those annoying edges or stitching that can press on your foot. Looking for something similar with a lower top? Then check out our Runner in the same line.

REACH

Sassy and striking – this high lace-up boot has it all. The Reach is made from supple leather that allows the boot to quickly mould to the shape of your foot. The unique dual-layer sole combines the best of two comfort worlds: the top layer keeps the boot light, while the bottom layer makes it durable and cushioning. Looking for a slightly lower boot or shoe? Then check out the Jump or the Fly in the same line.

AKITA

The striking, wavy sole on this boot gives it a playful look. It also stabilises the foot and provides extra cushioning. You'll feel that with every step. We've added an extra layer of foam under the footbed to make the boot feel even softer. The Nigata is a slightly lower version without laces.

06606 Why

WHY

This ankle-high lace-up shoe features a lightweight PU sole for extra cushioning. The upturned toe helps the foot roll easily off the ground. As well as laces, the Why has a zip on the inside. Once you have adjusted the laces to fit your foot, you only need to use the zip. Quick and easy! Perfect for combining with a wide range of great outfits. Be sure to check out the Feltwell, Okay, Whynot and Zigzag from the same line.

SHAN

This high boot is made on a more rounded last, so it's ideal for the slightly fuller foot. The sole is sturdy and made of cushioning PU. If you feel that the heel is a bit too high for you, remember that the sole is quite thick, so the effective height is lower than you think. Because they're made using the Ströbel method, in which the shaft is sewn elastically to the insole stitch by stitch, these boots are flexible. Be sure to check out the Midi and Arbol boots from the same line.

SHOES FOR BUNIONS (HV)

Wolky features a range of models designed specifically for people with bunions (hallux valgus). What makes these shoes special is the extra room at the big toe joint. This gives your foot more freedom and prevents pinching while providing the right support at all other points.

SHOES FOR DIABETICS WITH SENSITIVE FEET (DB)

Diabetes can cause sensitive feet. Our DB models have a special lining made of chrome-free microfibre and an extra layer of foam between the lining and the upper material. These models also have a seamless vamp, or front upper. If you have very severe diabetes, we recommend seeing an orthopaedist. If your diabetes is less advanced, why not try out these models?

Special micro-fibre lining with an extra layer of foam underneath

Seamless vamp, so no annoying seams

FIT2FEET (F2F), ALSO FOR BUNION SUFFERERS

Besides our HV line, we have also developed a line based on our unique patented Fit2Feet design. These shoes stretch precisely where those annoying bumps form at the onset of the big toe joint (hallux valgus). Even if you don't actually have bunions but your feet often hurt after wearing court shoes or pumps, our F2F models are definitely worth checking out. Feet expand slightly during the course of the day, so these shoes stretch where the pressure is greatest.

VEGAN SHOES

They may look like regular Wolky leather shoes, but appearances can be deceptive! For our vegan collection we use the very latest materials with the same excellent properties as our leather shoes, such as breathability.
